Contents

Squeeze casting: an overview 1
M.R. Ghomashchi, A. Vikhrov

Machining of Al/SiC particulate metal matrix composites part III: comprehensive tool wear models 10
M. El-Gallab, M. Sklad

A study on hydrodynamic deep drawing equipment 21
K. Dachang, L. Lihui, M. Xiaofeng, X. Jingquan

Grain growth model of IN718 during holding period after hot deformation 25
J.M. Zhang, Z.Y. Gao, J.Y. Zhuang, Z.Y. Zhong

Optimum blank design of an automobile sub-frame 31
J.-Y. Kim, N. Kim, M.-S. Huh

Spinnability and crystallizability of silica glass fiber by the sol–gel method 44
Y. Xu, W. Zhou, L. Zhang, L. Cheng

Composition, microstructure, and thermal stability of silicon carbide chemical vapor deposited at low temperatures. 47
Y. Xu, L. Cheng, L. Zhang

Ductile fracture in metalworking: experimental and theoretical research 52
B.P.P.A. Gouveia, J.M.C. Rodrigues, P.A.F. Martins

A study on barrelling in magnesium alloy solid cylinders during cold upset forming 64
R. Narayanasamy, S. Sathiyanarayanan, R. Ponalagusamy

Numerical simulation for the residual stresses of Stellite hard-facing on carbon steel 70
A.P. Wu, J.L. Ren, Z.S. Peng, H. Murakawa, Y. Ueda

Influence of strain rates and strain states on the formability of a superplastic 8090 aluminum alloy 76
H.y. Wu

Numerical design of the die land for shape extrusion 81
H. Nanhai, L. Kezhi

Application of the finite element method to predict microstructure evolution in the hot forging of steel 85
Y.-S. Jang, D.-C. Ko, B.-M. Kim

Study of added powder in kerosene for the micro-slit machining of titanium alloy using electro-discharge machining 95
H.-M. Chow, B.-H. Yan, F.-Y. Huang, J.-C. Hung

Cumulative creep and hot isostatic pressing of particle-reinforced metal matrix composites 104
N.P. Hung, C.S. Lim, Y.K. Ho, Y.C. Tan, W.G. Tan

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **www.elsevier.nl/locate/contentsdirect**

Elsevier Science S.A.

Hot rolling technique and profile design of tooth-shape rolls. Part 1. Development and research on H-beams with wholly corrugated webs 110
W. Zhang, Q. Zhou, Y. Li, Z. Cai, G.E.O. Wedera

Buckling strength analysis of the web of a WCW H-beam: Part 2. Development and research on H-beams with wholly corrugated webs (WCW) 115
Y. Li, W. Zhang, Q. Zhou, X. Qi, G.E.O. Widera

Optimization of the structure of an H-beam with either a flat or a corrugated web. Part 3. Development and research on H-beams with wholly corrugated webs 119
W. Zhang, Y. Li, Q. Zhou, X. Qi, G.E.O. Widera

Acoustic emission monitoring of sheet metal forming: characterization of the transducer, the work material and the process. . 124
S. Hao, S. Ramalingam, B.E. Klamecki

A thermal model of the wet grinding process 137
Y.S. Liao, S.Y. Luo, T.H. Yang

A three-dimensional finite element simulation of the vertical–horizontal rolling process in the width reduction of slab. 146
X. Shangwu, L. Xianghua, W. Guodong, Z. Qiang

In-process prediction of corner wear in drilling operations. 152
H.S. Liu, B.Y. Lee, Y.S. Tarng

The solidification and corrosion behaviour of austempered chilled ductile iron 159
J. Hemanth

Rolling of recycled plastic fibers 167
D.R. Carroll, J.S. Thomas

Microstructure and tribological properties of complex nitrocarburized steel 180
Y.H. Qiang, S.R. Ge, Q.J. Xue

A study on resistance welding in steel sheets using a tailor-welded blank (1st report). Evaluation of upset weldability and formability. 186
K.B. Min, K.S. Kim, S.S. Kang

Study on numerical analysis of the frequency characteristic of laser processing sound 193
T. Kurita, T. Ono, N. Morita

Formability of superplastic aluminum alloy composites reinforced with SiC particles 198
H. Yamamoto, H. Nishimura, A. Miyazaki

A comparison between the rigid–plastic finite-boundary element method and the penalty rigid–plastic finite element method . 209
Y.-M. Guo

Integrating experimental and computational strength optimization. 216
T.W. Lam, C.L. Lam, C.C. Yuen

Development of an expert system for the process design of axisymmetric hot steel forging 223
D.-Y. Kim, J.-J. Park

The development of the software for the controller of an automatic machine workshop by object-oriented programming 231
C.-L. Hsu, Y.-S. Liu

Evaluation of the mechanical properties and corrosion behaviour of ultra-clean steels. 238
R. Mendoza, M. Alanis, J. Huante, C. Gonzalez-Rivera, J.A. Juarez-Islas

Strain effects on the macroscopic behaviour and martensite morphology in shape-memory CuZnAl alloys 245
N. Kayalı, S. Özgen, O. Adıgüzel

The effect of scaling and emulsion delivery on heat transfer during the hot rolling of steel strips. 250
A. Shirizly, J.G. Lenard

An analytical model for the temperature field in the laser forming of sheet metal 260
P.J. Cheng, S.C. Lin

In-line process conditions monitoring expert system for injection molding. 268
F.T.S. Chan, H.C.W. Lau, B. Jiang

Analysis of thermal residual stress in plastic injection molding 275
X. Chen, Y.C. Lam, D.Q. Li

The formability of a thin sheet of Mg–8.5Li–1Zn alloy. 281
H. Takuda, T. Enami, K. Kubota, N. Hatta

Dry machining: Machining of the future 287
P.S. Sreejith, B.K.A. Ngoi

Monitoring of the condition of diamond grinding wheels using acoustic emission technique 292
A.A. Mokbel, T.M.A. Maksoud

Influence d'un défaut de fabrication sur le comportement mécanique d'un matériau composite verre–époxyde 298
C. Schmitt

355 nm Nd:YAG laser ablation of polyimide and its thermal effect. 306
W.K.C. Yung, J.S. Liu, H.C. Man, T.M. Yue

Transversal cracks and their behaviour in the hot rolling of steel slabs 312
E. Ervasti, U. Ståhlberg

Stereometric analysis and relation between the porosity of sprayed and sintered NiCrSiB plasma spray protective coating . . . 322
A.K. Das

Book review. 332
